**WORK PERIODS EXTENDED ON TWO CONWAY BRIDGE PROJECTS**  
***NH 16 OVER SACO RIVER AND RIVER ROAD OVER SACO RIVER OVERFLOW***

The New Hampshire Department of Transportation announces that work time periods for repairs have been extended for two Conway bridges.

Work on the River Road Bridge over the Saco River Overflow is expected to continue through the end of this year. These bridge repairs involve deck and rail replacement work. Temporary traffic signals are in place to allow for one lane of alternating traffic.

Also, bridge repairs to the NH Route 16 Bridge over the Saco River are expected to continue through the month of October. Temporary traffic signals are also in place at this bridge to guide vehicles through the one lane of alternating traffic.

Motorists are advised to use caution when driving through the work zone. Minor delays can be expected. In the event of inclement weather, work will be postponed until the following workday.
